

## Exploring New Frameworks

Proficiency Tests are not designed for a particular curriculum. They are universal so anywhere in the world, whether you were educated in a classroom or not, one can take this test.

### Dictations

Integrative Test - involves reading, writing and listening skills

- Includes 2 or more skills
- Involves components in higher levels of discourse (i.e. Phonology, syntax etc. etc.)
- If you are trying to test "listening" DON'T assess "spelling."
- Generally scored by "morphemes"
- More than a "spelling test." They test "memory" as you have to retain sentence information

Partial Dictation: A fill-in-the-blank where some words are missing

Cloze Dictation: A full dictation where there are no fill-in-the-blanks
